PCI-DSS ASV
Service Datasheet

PCI Security
Standards Council ®
APPROVED SCANNING VENDOR

Qualified by PCI SSC for ASV Program
purposes to conduct external vulnerability
scanning services in accordance with PCI
DSS Requirement 11.2.2.

PCI-DSS ASV Service:

Edgescan Continuous Compliance

Many of our customers require the flexibility of being able to conduct PCI-Approved scanning vendor (ASV) scans themselves. Instead of conducting them once per quarter, they may choose to run them daily, weekly or on a more ad-hoc basis. We call this "Continuous Compliance".

Edgescan provides a Premium ASV service for its customers. The secure engine allows clients to schedule scans on-demand, run reports when required, and conduct PCI-DSS approved Pen Tests when required, to ensure PCI-DSS compliance. It is powered by the same platform technology as the award-winning Edgescan Cloud SaaS for vulnerability management, which is used by some of the world's largest and best-known organisations.

As well as false positive free reporting, Edgescan ASV, has the added flexibility of running unlimited scans & re-tests for the same fixed annual cost. The solution has been fully approved for PCI ASV scanning across all geographies and is also an ISO27001 certified SaaS for even further assurance.

Instead of struggling with the pain of PCI-DSS compliance, move to Edgescan ASV, to go beyond compliance and never worry about mandated reporting again.

Features:

- **Agentless:** Edgescan ASV does not use agents or install software to perform the scanning service giving you peace of mind in the knowledge that your environment will not change.

- **No disruption:** When conducting a scan, Edgescan ASV does not interfere with the cardholder data system.

- **No dangerous testing:** Edgescan ASV is a production safe service. We operate 'lo & slo' to ensure we do not cause outages.

- **Above the Reporting Standard:** Edgescan ASV produces reports that conform to PCI-ASV standards, and we go beyond that with consolidated remediation information, so you know how to fix issues if you do fail a control.

- **Automatically schedule** the required quarterly scans, and scan as often as you like on an ad-hoc manner, for PCI compliance and for identifying and remediating vulnerabilities as soon as they appear in your network.

- **Custom scanning:** Segmentation exists in many networks. You can scan & re-test for vulnerabilities on target IPs. No need to scan your entire network block. It is up to you.

- **Leverage online help** and email/telephone support for understanding and fixing issues.

- **Maintain coverage** on all assets either on premises, in private, public or hybrid clouds.

- **Assess layer 7 web apps** during and after development to ensure they're securely built and securely maintained.

Benefits:

All PCI fails are validated: because the Edgescan SaaS validates all false positives, our ASV customers benefit from this extra diligence that is performed out of the box. This saves time and money for customers, and ultimately leads to faster compliance, and less compliancy overheads.

No disputed false positives: this leads to a drastic reduction in overall disputes, as Edgescan validates each PCI fail, you can be sure the vulnerability is real and not a wild goose chase.

Reduction in dispute resolution timeframe: No false positives, less disputes leads to faster resolutions and quicker or in some cases "continuous" compliance.

Step by Step consolidated remediation data at your fingertips: Any issue that needs to be fixed you have not only a step-by-step description of what to do, but you have a team of vulnerability and pen testing experts there to support and guide you through to a clean report.

Complete PCI Lifecycle Service: Think of Edgescan as the "continuous compliance" platform: proactive ASV scanning, unlimited PCI-DSS pen testing and full access to PCI DSS reports and results data.

Cost-effective and Unlimited Pen Testing: With the Edgescan platform there are no limits set to the number of re-tests that can be performed and all costs are fixed. No additional consultant fees. No time wasted waiting for results.
