Integrate Your Core Solutions

Businesses today depend on a range of different solutions to coordinate their operations within individual units or across their organization—tools for communication, workflow, asset management, webhooks, and more.

Edgescan's continuous security testing and exposure management SaaS platform seamlessly integrates into your

operational ecosystem, working in harmony with your leading technology solutions using an API-first approach that will enhance your overall security posture while safely enabling your existing continuous integration (CI), continuous delivery (CD), and DevOps tools.

Here are some major solutions that the Edgescan platform will enable you to operate without endangering your attack surface or your operational efficiency:
